Career Objective

Seeking opportunities in Data Analytics and Business Analytics roles where analytical, reporting, and problem-solving skills can contribute to business growth and decision-making. Skilled in data analysis, SQL, Excel, Power BI, basic Python, HTML, and CSS, with hands-on project experience in creating dashboards, reports, and data visualizations. Possesses exposure to manufacturing and pharmaceutical domains through apprenticeship experience, bringing a structured and process-oriented approach to analyzing business data and identifying meaningful insights.

Education

- Vignan's Foundation for Science, Technology & Research, Vadlamudi
Master of Business Administration in Business Analytics (2027)
- Sri Sivani College of Engineering, JNTU GV
Bachelor of Technology in Mechanical Engineering (2025)
CGPA: 8.26
- Sri Sivani College of Engineering – 2nd Shift Polytechnic, SBTET
Diploma in Mechanical Engineering (2022)
Percentage: 81.42%
- Sri Somanatha Green Fields Public School, CBSE
Secondary Education – 10th Grade (2019)
Percentage: 78.3%

Software/Technical Skills

- **Data Analysis & Visualization Tools:** Power BI, MS Excel
- **Programming & Querying:** SQL, Python (Basics)
- **Web Technologies:** HTML, CSS
- **Developer Tools:** Visual Studio Code
- **Other Tools (Engineering Background):** CATIA, AutoCAD, Ansys, MasterCAM

Industrial Training & Apprenticeship

- **Apprenticeship, Divi's Laboratories Limited** (6 Months)
Supported API/intermediate manufacturing for tablets; adhered to SOPs, maintaining 100% compliance with quality and safety standards.
- **Industrial Training, Indo-German Institute of Advanced Technology (IGIAT)** (6 Months)
Performed CNC machining, milling, and lathe operations; applied process automation to enhance precision and efficiency

Projects

- **E-commerce Sales Analysis**

Analyzed a large e-commerce dataset using Excel, SQL, and Power BI to identify key sales trends, customer purchasing behavior, and revenue drivers. Performed data cleaning, exploratory data analysis, and RFM-based customer segmentation to classify high-value customers. Developed an interactive dashboard to visualize KPIs such as sales growth, conversion rates, and product performance. Generated actionable business insights and recommendations to improve customer retention and optimize product strategy.

- **Personal Portfolio Website**

Designed and developed a responsive personal portfolio website using HTML and CSS to present educational background, technical skills, and project work in a structured manner. Focused on creating a clean, user-friendly interface with proper layout, styling, and navigation to enhance user experience. Implemented responsive design techniques to ensure compatibility across different devices and screen sizes. This project helped in gaining practical experience in web page structure, styling, and front-end development concepts.

- **Python-Based Calculator Application**

Developed a Python-based calculator application capable of performing basic arithmetic operations such as addition, subtraction, multiplication, and division. Built an interactive console interface to allow users to input values and perform calculations efficiently. Applied fundamental programming concepts including control structures, functions, and user input handling. This project strengthened programming logic, problem-solving ability, and understanding of core Python concepts.

Certifications

- Basics of Python – Infosys Springboard
- Basics of HTML – Infosys Springboard
- Basics of CSS – Infosys Springboard
- CISCO IT Essentials: PC Hardware and Software Course
